

TRADEFLOW

Enabling efficient, transparent and secure trade

dmcc.ae

MADE FOR TRADE

DMCC is home to more than 20,000 companies ranging from multinational corporations to start-ups. A further 170 companies join us every month, 95% of which are new to Dubai. Whatever their size and status, every member company is united in benefiting from unparalleled access to world-class business services, connections and infrastructure.

Over 100,000 people live and work here, attracted by our vibrant community, stunning property and high quality lifestyle. With excellent air, sea and road links, it is the ideal business base for Dubai, the UAE and beyond. Awarded the 'Global Free Zone of the Year' by the Financial Times fDi magazine for a record seven consecutive years, DMCC is indeed, Made for Trade.

Tradeflow

TRADE WITH CONFIDENCE

Tradeflow is a flexible and customised online platform to register possession and ownership of commodities stored in UAE-based facilities.

Providing a range of online services, Tradeflow is specifically designed to facilitate collateral financing, jewellery financing and provide Islamic Finance solutions.

New and of innovative products have recently launched that cater specifically for the trade finance demands of emerging markets such as China and India.

A trusted and robust central registry sits at the heart of any system that successfully facilitates trade, and this is the case with Tradeflow.

It is mandatory for all operators of DMCC-approved warehouses to issue a document of title for the commodities stored therein.

Each warrant represents a specific item, proving its existence and protecting the rights of ownership. Tradeflow's central registry enables the seamless execution of physical transactions in commodities by managing inventory, and facilitating the swift and secure transfer of ownership.

Legal title remains with the holder of the warrant

Proof of existence and quantity of stored commodity

Electronic document of title

Operating within a standardised, robust and enforceable legal environment, Tradeflow provides liquidity management and risk mitigation for banks around the world.

Transparent and secure, Tradeflow enables commodity owners to access finance whilst reducing exposure for lenders.

TRANSPARENCY

RISK MITIGATION

- Standardised contracts
- Endorsement by a Government of Dubai Authority
- Proof of ownership
- Commodities stored and secured as collateral for finance

Over the last decade, the UAE has emerged as one of the world's major gems and jewellery markets.

In 2018, Tradeflow collaborated with Brinks Global Services to offer a new innovative solution to the market.

Through using RFID (radio-frequency identification) technology, business owners are able to register, tag and

track their inventory as a means to secure finance.

Used as pledged collateral, tagged inventory is registered on Tradeflow and can remain in the possession of the business owner.

Jewellers can conduct business as usual, whilst finance providers are assured of the security of the financed inventory.

In order to facilitate Islamic liquidity management and financing by Islamic banks, Tradeflow offers its members a transparent and standardised environment for the trade of UAE-based commodities.

The electronic web-based platform provides access to physical commodities, and the ability to undertake multi-commodity and multi-currency trade.

Tradeflow integrates global Islamic financial and capital markets with the UAE physical commodities market.

REAL COMMODITIES

- Proof of existence and quantity of stored commodity
- Proof of lien free status
- Physical inspections available

REAL TRADE

TRADE

- Electronic transactions
- Standardised contracts
- Full title and possession

SHARIA COMPLIANCE

- Regular Sharia audit
- Halal warehousing inspections

Salam ("تمويل السلم" in Arabic), is a Shariah-compliant financing mechanism, and one of the Islamic banking solutions offered by Tradeflow.

Through Salam, a buyer is able to purchase a certain quality and

quantity of a commodity from a producer in the future, in exchange for an up-front payment on an agreed date.

By attracting, facilitating and promoting Salam transactions, Tradeflow supports the growth and digitalisation of Islamic banking.

10

Tradeflow is developing a
Blockchain based online
platform "E-Marketplace" to
facilitate trading and clearing of
commodities' forward contracts
for India based farmers.

The platform will provide a fit-forpurpose regulatory environment, state of the art infrastructure and innovative products and services to specific industry.

FAIR PROFIT
DISTRIBUTION

FOOD SECURITY As an independent evaluator, DMCC is committed to creating a completely transparent system and standard for warehousing in the UAE. The DMCC Warehouse Inspection and Ratings Programme - which incorporates Halal assessments - supplies the market with confidence that commodities stored in Dubai are safe, secure and accessible.
